Jl. MayorAchmadi, RT12, Jembangan, Plupuh, Sragen, Jawa Tengah

Freshgraduate in Telecommunication Engineering with a strong foundation in aviation navigation infrastructure, network security, and full-stack software development. Experienced in conducting preventive maintenance for critical communication systems, performing signal quality mapping via Drive Tests, and simulating network vulnerabilities. Proficient in bridging hardware troubleshooting with modern software solutions using Python, Flutter, and cloud deployments on Microsoft Azure. A highly analytical problem-solver with excellent documentation and teamwork skills.

EDUCATION

Telkom University, Bandung

Aug 2022 – Present

Bachelor of Telecommunication, Telecommunication Engineering

GPA 3.46 of 4.00

Undergraduate Thesis: Development Of A Nutrition Status Monitoring Application For Toddlers Based On Digital Image Processing

MAN 1 Surakarta, Surakarta

Aug 2019 – May 2022

Senior High School, Sains, 88,95 of 100

PROFESSIONAL EXPERIENCE

Telecommunications Engineer Intern, Boyolali

Jun 2025 – Aug 2025

Telecommunications Technician Division | AirNav Indonesia

- Conducted preventive maintenance and routine inspections on aviation navigation systems (DVOR, DME, ILS, NDB, Marker Beacons) and communication equipment (AMSC, Recorder, Radiolink) to ensure operational reliability.
- Performed periodic meter readings on the NDB control panel to monitor and record voltage and electrical parameters.
- Executed RJ-45 crimping, LAN testing, and the installation of STP and grounding cables to upgrade the Localizer system's network infrastructure.
- Assisted in the installation, connection testing, and cable management of ATIS and AFTN communication systems at the Meteorology office.
- Troubleshoot and repaired hardware issues, including restoring WiFi connectivity at the ATC tower and replacing Power Supply Units (PSU) on operational computers.
- Managed and recorded the inventory of electronic navigation devices scheduled for distribution.

Electronics Communication Laboratory Telkom University, Bandung

Jul 2025 – Jul 2026

Equipment Division Staff, Practicum Assistant

- Managed the preparation, maintenance, and allocation of laboratory equipment and components to ensure safe and seamless Electronic Communication practicum sessions.
- Conducted pre- and post-practicum inspections to guarantee all instruments functioned optimally according to specific module requirements.
- Administered the borrowing and returning procedures of practicum tools and maintained a comprehensive, up-to-date laboratory inventory.
- Identified and reported equipment malfunctions or missing assets to the Laboratory Coordinator to expedite maintenance and replacement actions.

LEADERSHIP EXPERIENCE

Gathrak 2023, Bandung

Apr 2025 – Jun 2025

Logistics Staff

- Directed and managed comprehensive end-to-end logistical operations for the entire event.

- Secured and maintained essential equipment, materials, and venue setups to meet all operational demands.
- Collaborated cross-functionally with committee members and various departments to ensure seamless event execution.

Roller Coaster 2023, Surakarta

Jan 2023

Logistics Staff

- Managed logistic equipment and inventory requirements to ensure the seamless execution of the JavaScript Seminar "RollerCoaster 2023".
- Coordinated with cross-functional committee teams to oversee venue setup and facility distribution during the event.
- Maintained operational efficiency and timely allocation of technical equipment and event resources.

LICENSES & CERTIFICATIONS

UiPath Academy Automation Developer Associate Training

Aug 2026

Uipath

Workflow development, data manipulation, debugging, UI automation, UiPath Studio Fundamentals

Introduction to CIP

Aug 2026

OPSWAT Academy

Gained foundational knowledge of the standards and requirements for critical infrastructure protection (CIP).

Introduction to Cybersecurity

Feb 2025

Cisco

Gained foundational knowledge of cybersecurity principles, including threat detection, defense mechanisms, and network vulnerabilities.

Fundamentals of Web Programming

Aug 2026

Dicoding Academy

Gained a comprehensive understanding of HTML and CSS fundamentals as the core building blocks of web development.

PROJECT & SKILLS

- **Final Project Development Applicatio Based On Digital Image Processing:** Developed the MoNas (Monitoring Nutritional Status of Children) Android application to monitor toddlers' nutritional status by estimating height and weight using digital image processing based on Hue Saturation Value (HSV) segmentation and a linear regression model. The application was built with the Flutter framework and SQLite for the frontend, integrated with FastAPI and OpenCV on the backend.
- **Cybersecurity Application:** Executed a network vulnerability simulation via an ARP Cache Poisoning attack using Python Scapy to manipulate ARP tables and redirect data traffic within a virtual network topology. The project also included real-time network traffic analysis and packet interception using `tcpdump` to verify the successful redirection of ICMP packets between hosts.
- **Cloud Computing:** Developed a microservices-based CRUD web application using Docker and Supabase, featuring JWT role-based authentication, and deployed the final system to Microsoft Azure.
- **Mobile Application Project:** Developed an interactive, game-based learning mobile application using Flutter, featuring real-time leaderboards, QR code integration, and comprehensive quiz management, with the backend infrastructure fully deployed on Supabase.
- **Language:** Bahasa Indonesia (Native), English (EPRT 450/677).
- **Hardskill:** Python, Flutter, HTML, CSS, Robotic Process Automation, Microsoft Office, Drive Test.
- **Softskill:** Communication, Problem Solving, Teamwork, Analytical Thinking
